

## ASX and MEDIA RELEASE

10 June 2008

### Drilling Update at Yeoval

- Augur Resources (ASX:AUK) has struck further promising results at its Yeoval mine prospect in the Lachlan Fold Belt of central New South Wales.
- Significant intersections of **1.10% copper and 0.28 grams per tonne gold over 8m** and **2.2% copper and 0.19 grams per tonne gold over 4m** have been intercepted in the YA009 diamond drill hole, within a zone of **28m at 0.83% copper and 0.21 grams per tonne gold**.
- Drilling continues with an additional four holes completed and two further holes underway.

Augur Resources has received the results of hole YA009, from the Yeoval mine prospect. Hole YA009 is approximately 450m west of the previously reported hole YA008 (**50m at 0.54% copper, 0.48 grams per tonne gold**).

Hole YA009 has intersected significant copper, gold, molybdenum and silver. Significant results from hole YA009 includes:

FROM	TO	WIDTH (m)	Copper %	Gold g/t	Molybdenum %	Silver g/t
123	151	28	0.83	0.21	0.02	3.5
<i>Including</i>						
126	130	4	2.20	0.19	0.01	4.5
143	151	8	1.10	0.28	0.04	9.0
166	170	4	1.10	-	0.06	7.5
174	197	23	0.30	-	0.03	-
<i>Including</i>						
184	187	3	1.27	0.1	0.10	4.7
225	234	9	0.56	-	-	1.8

Hole YA009 was drilled to 317m.

Augur's managing director Grant Kensington said: "The final results from hole YA009 are encouraging and confirm the western mineralised zone. A review of the drilling data to date suggests that two higher grade copper + gold + molybdenum zones exist within a larger anomalous zone at Yeoval mine prospect. The western zone is characterised by broad highly anomalous copper and the eastern zone with higher gold and silver values. Further drilling is required to determine the extent of these zones."

YA009 is a twin of a hole previously drilled by Hastings Exploration NL and North Broken Hill Ltd in the 1970's (hole Y17). Both holes were highly anomalous in copper, with hole YA009 slightly more anomalous in gold, molybdenum and silver. This is possibly due in part to variation in the hole path between the two holes.

### **Yeoval Mine Prospect**

The Yeoval project area contains known copper-gold- molybdenum mineralisation. Previous drilling at the prospect was wide spaced and focussed on identifying large near surface disseminated copper deposits.

Some of the more notable results from previous drilling at Yeoval mine prospect included:

42.7m @ 0.93% copper  
30.5m @ 0.89% copper  
16.8m @ 0.57% copper  
12.2m @ 0.65% copper  
18.3m @ 0.77 g/t gold  
30.5m @ 0.46 g/t gold

The current drill program at Yeoval mine prospect is aimed at defining a JORC compliant resource. The drilling program comprises of 4700m at Yeoval and up to 2000m to test for further mineralisation peripheral to the known mineralised zone.

*The information in this ASX announcement dated 10/6/08, referring to Augur Resources High Grade Mineralisation at Yeoval in NSW, is based on information compiled by Augur staff and approved by Robert Pyper, who is a Fellow of the AusIMM*

*Mr Pyper is the principal of Minnelex Pty Ltd., which is a geological consultancy. Mr Pyper has had over 40 years experience as a geologist and has had sufficient experience relevant to the styles of mineralisation and the types of deposits under consideration and to the activity which he is undertaking, to qualify as a Competent Person as defined in the 2004 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr Pyper consents to the inclusion in the report of matters based on his information in the form and context in which it appears.*

## Augur's projects

### About Augur

Augur is a NSW-based resource development company, with a focus on copper, gold and nickel projects within the Lachlan Fold Belt in western NSW. The region is a known producing area, especially for copper, gold and base metals and Augur is seeking to JORC define via an extensive drilling program its key projects with the intention of them moving to the pre-feasibility stage.

The Company has a highly experienced Board and Management team, which includes extensive experience in NSW and porphyry copper-gold exploration.
